FLEXIBLE SCHEDULE

Move the days around to suit your week. Keep four gym sessions and two walks where possible; avoid stacking two hard lower-body days back-to-back.

PROGRESSIVE OVERLOAD

Get a little stronger over time

Progressive overload means gradually asking your muscles to do slightly more. In this program the main method is simple: master 3 x 12 with good form, then increase the weight by the smallest sensible amount.

1 START AT A COMFORTABLE WEIGHT

Choose a load that allows 12 good reps. The last 2-3 reps should feel challenging.

2 OWN 3 X 12

Stay at that weight until all three sets of 12 are clean and controlled.

3 INCREASE SLIGHTLY

Move to the next sensible dumbbell or machine increment.

4 BUILD BACK TO 12

After increasing, 8-10 good reps is fine. Keep the new weight and build back toward 12.

SIMPLE DECISION RULE

Can't reach 12 cleanly

Keep the same weight or reduce slightly.

3 x 12 is hard but clean

Perfect. Stay at this weight.

3 x 12 feels comfortable

Increase the weight slightly next time.

LOG YOUR WEIGHTS

If you do not record the weights, it is easy to repeat the same workout for eight weeks without actually progressing.

GYM GUIDELINES

Keep it simple and consistent

1

WARM-UP

5 minutes on a treadmill, bike or cross trainer.

2

SETS & REPS

3 sets of 12 unless the workout says otherwise.

3

REST

60-75 seconds between working sets.

4

CHOOSE THE RIGHT WEIGHT

The final 2-3 reps should feel challenging, but your form must stay good.

5

GOOD FORM

Move with control. Use a range of movement you can own.

6

LISTEN TO YOUR BODY

Muscle effort is expected. Sharp pain is not.

7

WALKING

Add two 30-40 minute walks each week where possible.

8

MISSED SESSION

Do not double up hard sessions to catch up. Continue with the next sensible workout.

The program should feel challenging, not chaotic. Focus on controlled reps, steady progress and showing up for the next session.

8-WEEK PROGRESSION

Same exercises • better strength • better control

WEEKS 1-2

LEARN THE MOVEMENTS

- Use manageable weights
- Week 1 may be 2 x 12 while learning
- Move toward the full 3 x 12 by Week 2

WEEKS 3-4

BUILD CONSISTENCY

- Complete 3 x 12
- Improve control and range
- Increase only when 12 reps feel comfortable

WEEKS 5-6

GET STRONGER

- Several lifts should now be heavier than Week 1
- Keep form clean
- Do not chase load at the expense of technique

WEEKS 7-8

FINISH STRONG

- Keep progressing where appropriate
- Compare Week 8 loads with Week 1
- Notice confidence, stability and control

WHAT PROGRESS CAN LOOK LIKE

More weight for the same 12 reps

Better range of movement

Better balance and stability

Same weight feels easier and more controlled

LOWER BODY A

Day 1 • legs and glutes

6 EXERCISES

3 x 12

LOG THE WEIGHT USED

1

LEG PRESS

3 x 12
